SUMMARY

Enthusiastic Fullstack Developer with a strong interest in backend development using Node.js and practical experience through self-initiated and team-based projects. Built and deployed several applications, including a scalable social media platform and a real-time trivia game using React.js/Next.js. Passionate about learning new technologies, writing clean code, and solving real-world problems through software. Eager to contribute to a collaborative development team and grow as a software engineer.

TECHNICAL SKILLS

- Languages: Javascript, Typescript, Go-lang, PHP.
- Technologies: PostgreSQL, Node.js, Express.js, React.Js, Laravel
- Other: Algorithms, Data Structures, Problem Solving.

PROJECTS

- **Circle Apps**
  Developed a social media application featuring login, registration, posts, replies, follows, and likes. Built with Typescript, React.js, and PostgreSQL. See the source on **Github**.

- **Guess The Place**
  Created a multiplayer charades game where users can connect and play together. Utilized React Native, Node.js, Express.js, and WebSocket for real-time interactions. See the source on **Github**.

- **NoYo**
  Built a Booking hotel where users can create and booking place favorite. Developed with React Js, Node.js, Express.js, Typescript, and MongoDB. See the source on **Github**.

TRAINING

DumbWays Indonesia   **Nov 2023 - April 2024**
Fullstack Developer

- Program Fullstack Developer is an intensive 6 months to train future Fullstack developer in the fundamentals of software development.
- This rigorous 60-70hr/week program has a well-documented history of developing top notch software engineers.
- Course: Git, Github, REST API, PostgreSQL Typescript, ORM, Express.js, Node.js, React.js, React Native, Chakra UI ,Clean Architecture.
- Project: Building Circle-apps.

EDUCATION

Pelita Bangsa University   **Sep 2022 - Now**
Informatics Engineering

WORK EXPERIENCE

PT. JFE Steel Galvanizing Indonesia   **Aug 2018 - Aug 2020**
Junior Operator
- Inspection Product
    1. Ensured that the product has no defects and ready to launch
    2. Separated deficiencies from the product
- Control Machine Process
    1. Loaded the product into machine
    2. Cutted off deficiencies parts of the product
    3. Finished production process

CERTIFICATIONS

- Learn Go Course by Codecademy (Issued by Codecademy Feb 2023)
- Basic Go Programming (Issued by MySkill.id Mei 2023)
- Go (Basic) HackerRank (Issued by HackerRank Mei 2023)
- Problem Solving (Basic) (Issued by HackerRank Sep 2023)

INTERESTS

- Learning something new about technology.
- Interest with Forex Market for trading.
- Interest about design and animation.
